

Temporary? COVID 19 Dynamic Pricing Table for The Ursuline Center class

In an effort to still hold a class, despite the fact that enrollment is lower, the ACT SuperCourse is priced according to the number of students so as to generate sufficient income. Dynamic pricing (aka surge pricing) is often used for single ticket sales by professional sports teams and by the NCAA using criteria such as popularity and strength of opponent, team record, weather, etc. It is also used by airlines and hotels/motels during popular vacation seasons.
